

Imagine what would happen if you lost all the data on your PC because of a virus or hardware failure ...

Do you have a reliable back-up system to get you back up & running in minutes?

Introducing

Backup myPC

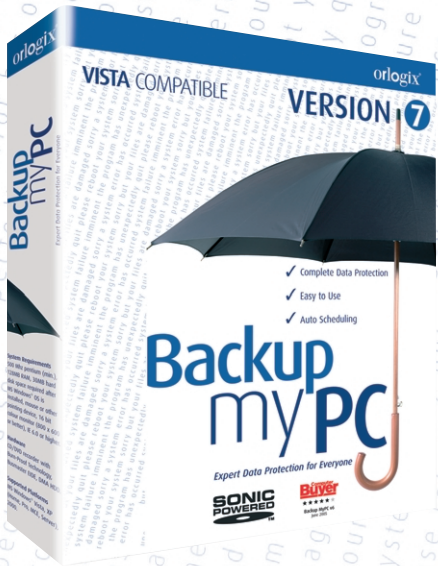

Expert Data Protection for Everyone

PRODUCT OVERVIEW:

Backup MyPC is a powerful backup program for home computer users, laptop-based executives or owners of small businesses. Designed with the usability needs of the non-technical user in mind, its award-winning features will nonetheless meet the requirements of most home offices.

5 REASONS TO CHOOSE BACKUP MYPC:

- 1. Value for Money**
Offers award-winning performance at a very affordable price.
- 2. Absolute Security for your Data**
Restore your operating system and data quickly and easily in the event of a computer crisis.
- 3. Advanced Features**
Unattended backups can be scheduled to take place automatically whenever you want; no more worries about forgetting to back up. Additional features include automatic verification of backed-up data against the original source, password protection and multi-user support facilitating individual backups.
- 4. Ease of Use**
A new, improved wizard-based user interface, which explains and illustrates the process & options simply and clearly using large icons and jargon-free language.
- 5. Supports Wide-Ranging Media**
Backup MyPC supports Blu-Ray, CD, DVD and dual-layer DVD recordable and re-writable devices, network shares or an external hard drive.
